

Sir/ Madam,

We would like to introduce ourselves as MAPAC TECHNOLOGY, located at Bhuj-Kutch, Gujarat, India, as the leading manufacturer of this new-age and eco-friendly Pallet in India presently. **The pallet we manufacture are Compressed Wood Pallet.**

Mapac Technology is an organization providing new-age and eco-friendly solution with growing environmental challenges. We engage ourselves in manufacturing the Compressed Wood Pallet. At present we are the leading manufacturers for Compressed Wood Pallet in India, with a vision to achieving the aim to give back to Mother Nature we are following the principal of ***“Thinking Eco-Friendly Future”***,

Keeping this in mind we have adopted a unique technology to manufacture environmental friendly or Eco-friendly bio-degradable Packing Pallet from the wood waste for the wide variety of applications to the various industries or uses.

Mapac Technology only uses the raw material from the renewable source to manufacture this bio-degradable compressed wood pallet. This compressed wood pallet mostly comprises of waste wood or wooden fibers, waste wood saw dusts, husks and similar bio-degradable raw-materials.

The **Compressed Wood Pallet which is environment friendly**, at the end of its lifecycle the it will become the part of the mother earth or nature through its natural ecological process of decomposing itself to its place of origin i.e. Mother Nature.

***Thus making our organizations journey towards achieving our
Principal a practically achievable reality i.e.
“Thinking Eco-friendly Future”.***

Not only we but every individual or the organization attached to us, directly or indirectly is playing a valuable role in our mission of achieving our principal ***“Thinking Eco-Friendly Future”***.

Properties and Advantages

Mapac Technology Compressed Wood Pallets are:

- Compliance to ISPM 15, does not require to be heat treated or fumigated as per the (Exemption under Clause 2.1 of ISPM 15 Regulated Wood Packaging material)
- Strong and durable.
- Resistant to moisture,
- Anti-termite and anti-fungal.
- Reusable and recyclable i.e. Environment friendly.
- Space saving and nestable, reducing transportation cost and handling time.
- Offer an alternative to conventional wooden and expensive plastic packing and shipping materials.
- Easy shipping and export thus reducing custom clearance clerical work and time for the Custom Authorities and clients as well.
- Weight 15 Kgs. to 25 Kgs. Depending on the various sizes as per customer requirements.
- Light-Weight and Durable - Compressed wood Pallets are durable enough to be reused yet inexpensive enough to be expendable.

Mapac Compressed Wood Pallet Details:

<u>Model No.</u>	<u>Size</u>	Load capacity (Uniform weight in Kgs.)		
		<u>Stacking</u>	<u>Lifting</u>	<u>Racking</u>
MP1	800 x 1200	2000	1200	N.A.
MP2	1190 x 990 (1200 x1000)	3000	1500	N.A.
MP3	1100 x 1100	3000	1500	N.A.
MP4	1130 x 1130	3000	1500	N.A.

** Per piece weight of the pallet is subject to change as the natural wood fiber properties vary in different species of wood used for manufacturing. Tolerance weight Plus (+) or Minus (-) 1 kg.*
